Impact Hub Athens

Sustainability Statement

Jan 2024

WORKSPACE

At Impact Hub Athens, sustainability is ingrained in the design of our workspaces. We prioritize creating environments that foster collaboration, productivity, and accessibility. Our commitment extends to minimizing our environmental footprint by incorporating sustainable practices in facility management, including the promotion of hot desking. By encouraging hot desking, we optimize space utilization, reduce energy consumption, and enhance flexibility for our community members.

We also implement energy-saving practices, ensuring that our workspaces are equipped with energy-efficient lighting, heating, and cooling systems. These measures not only contribute to a more eco-friendly workspace but also align with our commitment to sustainable and responsible business practices.

EVENTS

In our event planning, we embrace sustainability as a guiding principle. We minimize waste, encourage recycling, and strive to source locally-produced catering options to reduce our environmental impact. We select vendors and suppliers based on environmental standards adopted for our events, who align with IHAth ethos and mission, our sustainability objectives and those of our members, prioritizing sustainably sourced materials, zero waste practices, and adherence to eco-friendly guidelines. Through these choices, we aim to inspire creativity while maintaining a focus on responsible consumption. By fostering eco-conscious practices in our events, we contribute to a more sustainable and mindful community.

WORKSHOPS AND TRAINING

Our commitment to sustainability extends to our educational programs. We offer a range of programs that are interconnected, starting from identifying the idea, integrating it into the appropriate educational and business planning, to the stage where it is individually supported to expand locally and internationally. Through these programs, we empower our community members to develop sustainable ideas and businesses, contributing to a more resilient and socially responsible entrepreneurial landscape.

As we work towards a more sustainable future, Impact Hub Athens remains dedicated to fostering a collaborative, accessible, and environmentally conscious community. We continually explore innovative practices within our workspace, events, and education initiatives, inviting our community to join us on this journey toward a more sustainable and inclusive future.

COMMUNITY

At Impact Hub Athens, we are experts in interconnecting people and promoting collaborations within our local and global community. By fostering a culture of social entrepreneurship, we encourage meaningful connections that lead to impactful collaborations and positive societal contributions. As we build networks and communities, we are committed to creating a lasting impact that not only empowers individuals and businesses but also contributes to a more sustainable and inclusive future.

ENTREPRENEURIAL TOOLS

We provide access to tools, methodologies, expertise, mentors, and financing opportunities to help entrepreneurs increase the social impact of their ventures. By offering comprehensive resources, we support the development and growth of socially responsible businesses within our community.

CONSULTING

Our support extends to consulting services for professionals and organizations throughout the entire project lifecycle. From idea generation and incubation to acceleration and scaling, we provide guidance and expertise to ensure the success of socially impactful projects. Our consulting services align with our commitment to sustainability, promoting responsible business practices and positive societal contributions. Upholding ethical standards and compliance with legislation, we pride ourselves on being an intelligent and reliable customer. Our understanding of the risks and complexities inherent in the services we procure allows us to respond to performance issues appropriately. Furthermore, we prioritize embedding diversity, fairness, and transparency within our supply chain practices.
